

DeLaval swinging cow brush

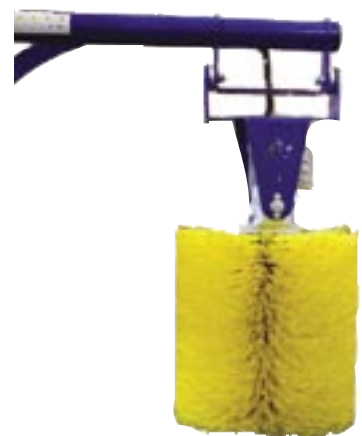

All around cow comfort

Clean
and
well
groomed
cows will
contribute to
greater herd health.

Brush up on cow comfort

The swinging cow brush, exclusively developed for DeLaval, is designed to improve cow health, comfort and welfare. The brush, which starts to rotate on contact, is a revolution in cow care and cow comfort. Rotating at an animal friendly speed this unique brush swings freely in all directions, smoothly up, over and alongside the cow to provide comfort all around. The bristles have the right length and hardness to stimulate the blood circulation whilst helping the cow to keep clean and calm. Cows in good health produce more milk and with a DeLaval swinging cow brush you will make sure your cows have the best possible comfort conditions.

Easy and safe

The swinging cow brush not only reaches more parts of the cow's body than brushes which simply rotate, it also takes minimal barn space to operate in.

Pre-mounted so it is easy to install, the cylindrical brush is suitable for wall or post installation. If it is installed in the right space in a loose housing barn it helps the flow of cow traffic, guiding cows from the feeding area to the resting area. Correctly placed, it stops cows from hurting themselves by scratching on the interior in the barn.

The exclusive design has safety built in as well, with overload protection against overheating and IP55 protection which enables the brush to be installed outside if desired. The energy saving automatic on/off feature starts the brush rotating on demand and stops it within 10 seconds after use. The brush unit is easy to clean too, with high pressure cleaners. This facilitates good barn hygiene.

Exclusive design

The hard wearing design ensures a long term investment. The hinges are strong and durable to secure a safe and smooth swing over action. The brush unit makes it easy to replace the brush. The brush unit can also be easily dismantled for cleaning. The DeLaval swinging cow brush has a patented unique design. It delivers a safe and efficient grooming for your cows.

All around cow comfort

- Grooming all over
- Flexible to place on wall or post
- Low on energy consumption
- Easy to keep clean
- Suitable for 50 to 60 cows
- Promoting cow traffic
- Increasing animal health and welfare
- Increasing the performance of your herd

TECHNICAL FEATURES

Application:

The DeLaval swinging cow brush

- Is available in two executions:
 - a) Wall mounting (standard)
 - b) Post installation (2"-2,5", 3-3,5", 4")
- Is suitable for cattle over 1 year old.
- Should not be used by animals with hair longer than 5 mm.

Technical facts:

- Rotating speed 22 rpm
- Automatic on/off
- IP55 protection
- Overload protection
- Brush unit with 18 cm long bristles

Technical details:

- Dimensions: (LxWxH) 90x90x82 cm
- Installation height from ground: (und. side brush) 100 cm
- Diameter brush: 50 cm
- Width: 60 cm
- Weight: 35 kg
- Power: 0,06 kW
- Voltage

915262-01	230 V AC
915262-02	110 V AC

Installation:

The brush will be delivered pre mounted. For two persons working together, installation takes approximately 1½ hours.

For correct mounting measurements we provide you with a mounting stencil. The average height is 100 cm above floor measured from the underside of the brush. Four holes to be drilled, mount the brush and that is it!

As soon as the cow pushes the brush it starts to swing. When the cow leaves the brush it stops after app. 10 seconds.
